Borough Council Liaison Chris Richter, Yash Samat,

Committee Chair Opening (Scot Kuehm)

Minutes of Oct, 5th meeting: Motion to approve Ethan Grodofsky, Second Debra Dewing

Old Business

- Grunden's Pond – We are still waiting for the Engineers report. This has been going on for years
- Debra recalled Mitch stating that the Sunset Project is scheduled for Fall of 2022 and that Grunden's can be done at the same time. We will follow up with Mitch to confirm and get an update.
- Regarding recurring photos of the lake, Mitch has access to this technology. We will follow -up.
- Questions for Ferraro Engineering.
 - a. We need a definitive definition between Dredging and Removal of unconsolidated waste?
 - b. What are some of our options for long term maintenance for the volume of water in our lakes?
 - c. What are our options considering the permits we need for 2022?
 - d. What are the issues regarding disposal of the unconsolidated waste and is there a place we can put it?

Solitude Lake Management Report (Bob Schindler)

- Bob submitted the 'Living Shore Line' proposal for Wildwood Lake. We are all set to proceed because it was determined that permits are not necessary for this work. There are two parts to the project: On the left side of the dock, the 'SOX' Project, the plan is to leave the rocks that are there and rebuild the bank that is eroding. This rebuilt area will be merged into the upland area. On the right side of the dock, this area will require just 'plant based' repair.
- Bob will provide a price range for residents who wish to engage in one of these projects.
- December 7th will be the 'State of the Lakes Annual Report Meeting'. This will be a Zoom Presentation.
- The Student Reps will be asked to promote this within the School, Eco Club, Science Classes etc.

Motion to adjourn: Derek Jackson, Second Ethan Grodofsky
